

UI/UX Designer, Streaming Platforms

Knowledge Network, BC's public broadcaster, is looking for a UI/UX Designer and proficient coder who is passionate about web and app design, loves solving customer problems, and has innovative ideas for delivering amazing visual experiences to our streaming subscribers.

About You

You're an incredible visual and interaction designer, with a keen interest in working on streaming platforms. As a user experience expert, you can bring digital media projects from concept to completion, doing everything possible to ensure their success. You're a skilled communicator who welcomes honest, candid feedback. You have strong technical skills rooted in HTML5, CSS3 with an understanding of Javascript and jQuery. You're a collaborator who thrives in team environments with backend engineers, designers, and developers.

Responsibilities

- Conceive, lead and deliver innovative designs
- Develop wireframes and other UX /UI documents used in planning Web / App designs
- Deliver a fully themed and tested front-end in HTML 5 and CSS to match graphic designs
- Build reusable code and libraries for future use
- Rapidly iterate on designs amongst engineering and design constraints
- Collaborate with other team members and cross departmentally

Skills & Qualifications

- Graduate of Web/Digital Design program with 3+ years design experience on consumer-friendly interactive experiences
- A great portfolio that showcases deep visual and interaction design skills
- Ability to quickly produce multiple UX/UI concepts with the communication skills to clearly articulate and defend your concept
- Proficient understanding of web markup, including HTML5, CSS3
- Solid understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Theming for Drupal 7 / 8 a big plus
- Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
- Proficient understanding of code versioning tools, such as (Git / Mercurial / SVN)
- A passion for public television
